

Disposable Lawn Trimming Boots

We're taking a product already on the market called Ice Back shoe covers, but we're redesigning the product for a different purpose. We're going to lengthen the cuff of the boot from the ankle to the top of the calf. This product will be named Disposable Lawn Trimming Boots in which its purpose is to keep clothing and your shoes from grass stains while you are trimming your grass. They would come in bright colors preferably orange for visibility. One size fits all. One nice feature is that they are disposable. There would be a small elastic band at the ankle and just below the knee for a snug fit.
